SPECIAL NOTICE LETTER

Re: Martha C. Rose Chemicals Co., Inc., Site
Holden, Missouri

Dear Mr. Cochran

The United States Environmental Protection Agency ("EPA") has documented the release or threatened release of hazardous substances, pollutants or contaminants at the above-referenced Site. By previous correspondence, EPA provided written notice to Central Illinois Public Service (hereinafter referred to as the "Organization") that the Organization was a party who may be liable for money expended by EPA in connection with the subject Site. A similar letter was sent to the other known potentially responsible parties. In these letters, EPA also offered your Organization and other potentially responsible parties the opportunity to voluntarily undertake appropriate response actions at the Site.

In the spring of 1986, negotiations commenced with the Rose Chemicals Steering Committee ("RCSC"), an organized group of parties potentially liable for conditions at the Site under Section 107(a) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (CERCLA), 42 U.S.C. § 9607(a). As a result of these initial negotiations, the RCSC agreed to stabilize the Site and to conduct an inventory of the abandoned waste at the Site under an administrative order on consent (AOC). Subsequent negotiations in 1987 resulted in a second AOC whereby the RCSC agreed to remove and dispose of a
